

Raf Carpentry Website

Editing Guide for GitHub

Your website auto-updates when you make changes on GitHub. No code knowledge needed - just find the text, change it, and save. This guide shows you exactly what to click.

1. Edit Text on Any Page

Step 1: Go to your GitHub repo

github.com/rafmoney503/raf-carpentry

Step 2: Navigate to the page file

Click through these folders to find the page you want:

Page	File Location
Homepage	src/app/page.tsx
About	src/app/about/page.tsx
Portfolio	src/app/portfolio/page.tsx
Contact	src/app/contact/page.tsx
SketchUp	src/app/sketchup/page.tsx
Cabinetos	src/app/cabinetos/page.tsx
Blog	src/app/blog/page.tsx
Tools	src/app/tools/page.tsx

Step 3: Click the pencil icon to edit

Look for the pencil icon in the top-right corner of the file view.

Step 4: Find and change the text

Text is inside quotes. Example:

```
<h1>"Bespoke Carpentry"</h1>
```

Change the words inside the quotes. Leave the tags alone.

Step 5: Click green "Commit changes" button

Add a short description like "Updated about page text"

Step 6: Wait 60 seconds, then refresh your website
raf-carpentry.vercel.app (or rafcarpentry.com once connected)

TIP: Press Cmd+F (Mac) or Ctrl+F (Windows) to search for specific text in the file.

2. Add Images

Step 1: Go to the images folder

github.com/rafmoney503/raf-carpentry/tree/main/public/images/projects

Step 2: Click "Add file" then "Upload files"

Step 3: Drag your photos onto the page

Use simple names with no spaces: kitchen-remodel.jpg, garden-office.jpg

Step 4: Click "Commit changes"

Step 5: Update the page code to use the new image

In the page file, find the image reference and change the filename:

```
src="/images/projects/your-new-image.jpg"
```

TIP: Keep image filenames lowercase with dashes, no spaces. Example: navy-kitchen.jpg

3. Add a Blog Post

Step 1: Go to the blog content folder

github.com/rafmoney503/raf-carpentry/tree/main/content/blog

Step 2: Click "Add file" then "Create new file"

Step 3: Name it with .md extension

Example: my-new-kitchen-project.md

Step 4: Paste this template and edit:

```
---
title: "Your Post Title Here"
date: "2026-04-10"
excerpt: "A short summary that appears on the blog listing"
image: "/images/blog/your-image.jpg"
---

Write your blog post here.

You can use paragraphs like this.

Add bold text or italic text.

## Add Headings Like This
```

Keep writing as much as you want.

Step 5: Click "Commit changes"

Your post will appear on /blog automatically!

4. Quick Reference

Page	File Location
Homepage	src/app/page.tsx
About	src/app/about/page.tsx
Portfolio	src/app/portfolio/page.tsx
Contact	src/app/contact/page.tsx
SketchUp	src/app/sketchup/page.tsx
Cabinetos	src/app/cabinetos/page.tsx
Blog	src/app/blog/page.tsx
Tools	src/app/tools/page.tsx

Task	Where to Go
Edit homepage	src/app/page.tsx
Add project images	public/images/projects/
Add blog images	public/images/blog/
Add SketchUp images	public/images/sketchup/
Write blog post	content/blog/
Change affiliate links	src/lib/affiliates.ts
Edit mini-site (/ms)	src/app/ms/page.tsx

Site updates automatically after each commit. Wait 60 seconds, then hard refresh (Cmd+Shift+R) to see changes.
